*Allowable Subject Matter*

1. Claims 1-21, 29-30, 32, and 42-46 are allowed. The claims will be renumbered as 1-29.
2. The following is an examiner's statement of reasons for allowance: with respect to claims 29-30, 32, and 42-46 the reasons for allowance of claims 29-30, 32, and 42-46 presented in the last Office Action are not repeated herein, but are incorporated by reference. With respect to claims 1-21 the prior art of record do not teach or suggest, among other things, extracting means for extracting a pixel corresponding to an object including a target pixel from the thin-line image, when the event detecting means detects the event at the position designated by the user's operation in a space direction of the target image, by setting, as the target pixel, a pixel of the thin-line image corresponding to the one component image at the position designated by the event, by storing a pixel value of the target pixel at the stored position corresponding to the position on the target pixel, by searching for a portion up to a thin-line area of the thin-line image in the space direction at the set target pixel as the origin, and by storing the pixel value searched at the stored position corresponding to the searched pixel position; and control means for, when the user selects at least one part of the object displayed on one screen out of the plurality of screens displayed on said display means, controlling an operation for transferring and storing the pixel value of the pixel stored in said primary storing means corresponding to the selected part, at the stored position corresponding to the position of the pixel in said object storing means, and also controlling such an operation that said designated position storing means stores the position corresponding to at least a part of the object selected, said table means stores the component and the threshold corresponding to at least a part of the object selected to have a corresponding relationship with the identifier, and said history image storing means stores the identifier, as the

pixel value, at the position of the pixel in at least one part of the object selected. It is for these reasons and combination with all of the other elements of the claims that claims 1-21 are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
